

Highly skilled Software Engineer with 5+ years of experience in full-stack development. Proven ability to design and implement scalable solutions using Rust, Go, and React. Strong focus on performance optimization and system architecture.

TECHNICAL SKILLS

Languages

TypeScript Rust Python SQL

Frontend & UI

React Svelte Tailwind CSS

Backend & APIs

Node.js Hono REST gRPC

Tools & Infra

Docker Vercel Git PostgreSQL

WORK EXPERIENCE

Senior Developer | CloudScale Systems , Remote

Jan 2022 - Present

Leading the core infrastructure team to migrate legacy monolithic services into a distributed microservices architecture.

- Reduced system latency by 40% using Redis caching strategies.
- Mentored 4 junior developers and established CI/CD best practices.

PROJECTS

Distributed Task Scheduler

[github.com/ariver/task-master](#)

A high-performance Go-based task scheduler capable of handling 10k+ concurrent jobs with automated retry logic.

Stack: Go gRPC PostgreSQL Docker

AI Semantic Search Engine

[search-demo.alexriver.dev](#)

Built a vector-based search interface for technical documentation using Python and Pinecone.

Stack: Python OpenAI API React Tailwind CSS

Real-time Analytics Dashboard

[analytics.river.io](#)

A data visualization platform for monitoring IoT sensor telemetry with sub-second refresh rates.

Stack: Next.js Apache Kafka ClickHouse D3.js

P2P File Transfer Protocol

[github.com/ariver/rust-p2p](#)

Implemented a custom peer-to-peer file sharing protocol with end-to-end encryption and NAT traversal.

Stack: Rust Libp2p Tokio Protobuf

EDUCATION

University of Tech — B.Sc. Computer Science

Graduated May 2019
