

First Name Last Name

Rust & AI Systems Engineer

0712345678 | user@example.com | linkedin.com/in/user | example.com | United Kingdom (willing to relocate) | US Citizen (Eligible for Skilled Worker Visa)

Systems and AI Engineer specializing in low-latency CLI/TUI developer tooling in Rust and fine-tuned SLM security proxies for agentic workflows.

TECHNICAL SKILLS

AI & Security:	QLoRA / Unsloth, 4-bit SLMs, Ollama (GGUF), Hugging Face, InjecAgent, IPI Sanitization
Infra & DevOps:	Docker, Linux, GitHub Actions CI/CD, PostgreSQL, Redis
Languages:	Rust, Python, TypeScript, SQL, C++
Systems & Tooling:	Tokio, Ratatui, Typst Engine, Axum, gRPC, Serde

WORK EXPERIENCE

Software Developer @ Company Name , location

June 2023 - Current

Developed something something something.

- Integrated Paystack/Stripe RESTful APIs.
- Built responsive UIs with TailwindCSS.
- Reduced bug reports by 30% using Sentry.
- Developed a new feature that increased user engagement by 20%.
- Collaborated with cross-functional teams to deliver high-quality software.
- Mentored junior developers and provided technical guidance.
- Participated in code reviews and ensured code quality.
- Implemented automated testing to improve code reliability.
- Optimized application performance to reduce load times.
- Contributed to the development of a new product that increased revenue by 15%.

Technical Support Intern @ Company Name , Nairobi

Feb 2023 - May 2023

Provided technical support for engineering teams.

- Managed software installation for 3 departments.
- Coordinated workflows using Office 365.
- Resolved technical issues for end-users and provided guidance.
- Documented technical procedures and user guides.
- Collaborated with IT team to improve support processes.
- Assisted in troubleshooting hardware and software problems.
- Conducted training sessions for new employees on software usage.
- Maintained inventory of IT equipment and supplies.
- Prepared technical reports and presentations.
- Supported the implementation of new software systems.

PROJECTS

Securing SME Agent Skills via Fine-Tuned SLM Proxies | Python, [github.com/cntrvsvy/secure-sme-agent-skills-slm-proxy](#)

Qwen 2.5 (3B), QLoRA / Unsloth, Ollama, Hugging Face

- Fine-tuned 4-bit Qwen2.5-3B via QLoRA to sanitize agentic tool definitions (SKILL.md) against Indirect Prompt Injection (IPI) attacks.
- Curated and published open-source 3.2k-sample SME agent skill security dataset and 4-bit quantized GGUF weights on Hugging Face.
- Benchmarked against InjecAgent evaluation harness, deploying low-latency local inference proxies via Ollama on edge hardware.

Terminal Based Resume Generator | Rust, Ratatui, Typst, Serde

[github.com/cntrvsvy/resume-pipeline](#)

- Architected a high-performance CLI/TUI developer tool in Rust using Ratatui for interactive, targeted resume composition.
- Integrated Typst layout engine to compile modular YAML data streams into publication-ready PDF resumes with sub-second latency.
- Engineered type-safe preset serialization and granular section/bullet toggling to rapidly tailor CVs for specific job descriptions.

EDUCATION

school name	— M.Sc in something	Expected July 2026
school name	— B.Sc in something	Graduated 2025
